3 Cakes PALMOLIVE Soap 30¢
1 Jar "P. O." Cream or
1 Box "P. O." Shampoo . . 50¢
80¢

YOURS FOR ONLY 44 CENTS!

You know the quality of all PALMOLIVE products and what wonderful value this offer affords. It's to introduce PALMOLIVE Cream and PALMOLIVE Shampoo to the particular women that use PALMOLIVE Soap—get *your introduction* at our store today!

Orchard City Drug Co.

C. G. Young who has been visiting his brother, Henry, and family at Campbell left by auto for his home at Reno, Sunday.

Elgin Hurlbert, Jr., of Pacific Grove, is enjoying a part of his vacation time here with his cousins, Franklin and George Blaine.

California Progress Recorded

San Francisco, Aug. 7.—Actual construction on the S. P. Co's $2,000,000 building has started. It will be the finest office building in city.

Chico—Work started at Woodland on largest rice mill in California.

Martinez—Work on Martinez-Concord Electric R. R. expected to start soon.

Redwood City—Christofferson's aeroplane factory gets $30,000 contract from Government for 2 machines and engines.

Oakland—J. D. Barnes Co. gets contract to build two $300,000 ships.

Oakland—First plant in U. S for manufacture of Aniline dyes will be in operation here within 90 days.

San Francisco—Reports are that D. C. Jackling will erect a $500,000 mansion here.

Bakersfield—Associated Oil Co. spending $1,500,000 on new pumping stations and improvements to other equipment.

Alameda—Union Iron Works plan to expend $300,000 on ship-yard here if it can get 50 year lease to property.

California ranks second in production of Tungsten ore.

Work on State Highway between Beresford and Redwood City started.

Local and Personal

Arthur McCarty is the proud possessor of a new five-passenger Buick.

Harness and farm truck in A1 condition. Inquire of Mrs. B. Herrington.

Mrs. Oluf Strom and children went to Santa Cruz Saturday for a week by the sea.

Mrs. R. E. Dunphy, Nick and Harriet went to the Call of the Wild Tuesday for two weeks.

Modern Bungolow for Rent: Furnished or Unfurnished. Inquire Lottie L. Miracle.

The W. L. Douglas and other good dress Shoes for Men $3.50 and $4.00 at E. E. Sower.

Miss L. M. Self of San Mateo arrived Monday for a short visit with her sister, Mrs. J. H. Stubbe.

H. E. Brandenburg has put his faithful "old hoss" in the discard and is "whoaing" to a new Ford.

Mrs. Hoque has moved to San Jose, having traded her property on Payne avenue to G. A. Warfield.

J. C. Lloyd and son, Merle, of San Francisco, left Monday for Reyes on their annual deer hunting trip.

Mr. and Mrs. C. E. Hanger returned from Seabright Friday, C. E. driving his new machine over the mountains.

Mr. I. W. Snow returned Monday from Pacific Grove where he spent several days last week cooling off.

Mrs. W. B. Kammerer and children went to Berkeley Friday for a week in the Bay Cities with Mr. Kammerer.

There was certainly a "hot time" at the Manse Monday afternoon, when the Parson, in cleaning up his den, burned over 350 sermons.

Prof. E. A. Powers and family arrived from Chico, Monday for a visit with Mrs. Power's parents, Mr. and Mrs. Jos. Bohnett, and family.

Lawrence Hawkinson returned Saturday from Berkeley summer school. Lawrence has been elected to one of the schools in Stockton at a neat increase in salary.

Dr. J. L. Berry of Sacramento was here Sunday visiting his sister, Mrs. M. J. Wilson. He took Mrs. Wilson and Mrs. Onie Putnam to Livermore for an auto ride.

Rural Carrier W. S. Dowton has had a busy season for the past month. He has carried 18,500 pieces of mail on route No. 1, weighing 2600 lbs, and served 458 families.

After the report of a special committee appointed to confer with the Rev. G. E. Atkinson concerning a reconsideration of his resignation, which it reported as final, a vote was taken to accept the same which will take effect September 1st.

Mr. and Mrs. John Schnorenburg were guests of Mr. and Mrs. D. H. Cramer Saturday and Sunday. Mr. Schnorenburg taught at Lake Geneva, Wisconsin, on the same faculty with Mr. Cramer. After several years apart the two happened to meet again at the Berkeley summer school this year.

Mrs. Minnie Lewis was the guest of honor at a birthday surprise party given for her at the apartments of Mrs. M. J. Kenfield, Thursday evening. The party was made up of Mrs. Lewis' "girls" of the cannery. She was presented with a substantial order on a dry good store. We were not informed of her number of years on this globe, but we surmise it has not been many.

80 Cents' Worth of "Palmolive" for ONLY 44 Cents!

3 Cakes of PALMOLIVE Soap, a Jar of PALMOLIVE Cream or a bottle of PALMOLIVE Shampoo—44 cents buys this assortment at this store. A wonderful opportunity to stock up on fine toilet goods at a fraction of the usual cost—the price of the three cakes of soap is usually 30 cents, that of the cream or shampoo 50 cents—you get an actual 80 cents' value in all! Better come in and get yours now—you may want to repeat—you know PALMOLIVE quality. No restrictions, as much as you want—**spend 80 cents and get 6 cakes soap and both Cream and Shampoo.**

Blaine's GENERAL MERCHANDISE

Miss Mary Rodeck is reported much improved.

Now is the time to have H. C. Smith send in your subscription for magazines.

Light Housekeeping Apartments furnished. For Rent. Inquire Mrs. M. J. Wilson. No. 136 Campbell avenue.

Leroy Sharp and his school-mate, Kenneth Westlake, of Tracy, are home from a pleasant outing at Pacific Grove.

The Rev. G. E. Atkinson as chairman of the efficiency committee of the California Congregational conference will go to Berkeley Saturday on an inspection trip at the Park church.

The Rev. and Mrs. G. E. Atkinson went to Martinez Wednesday to look over their parsonage home and make arrangements for occupying it. The Martinez parsonage is second only to Campbell in the Congregational parsonages of California.

The mill site for the Campbell Redwood Lumber Co.'s plant is being put in readiness for building the mill. Part of the machinery is on the ground ready for installation and the concrete work for supports has been laid. C. B. Miracle is superintending the mill construction.

At the meeting of the dry campaign committee Monday evening, J. F. Duncan resigned owing to the press of other business matters. C. H. Whitman was selected in his stead. The local field committee is composed of Dr. Cooper, Mrs. Mae Whitman and Rev. W. H. Lloyd.

Yosemite Survey

Camp Curry, Yosemite Valley,

To find out how the valleys of the Yosemite National Park were made, a government geological expedition left Yosemite this week for Hetch Hetchy. A comparative study of the rock formations of the Yosemite and Hetch. Hetchy valleys will be made by F. E. Matthes and F. C. Calkins of the U. S. Geological Survey, and geological problems which have long been a subject of dispute will be explained in a volume to be published shortly by the government.

Yosemite was probably inhabited by a primitive race of human beings during the interval between the first and second glacial epochs, and Professor Matthes hopes some day to find relics of this vanished race. During the inter-glacial period the climate of Yosemite was warmer and the vegetation more luxuriant than at present, according to Professor Matthes.

Mr. Matthes and others believe that Yosemite was formed by a combination of earthquake action, erosion and glaciation. When three separate upheavals lifted the Sierras to their present height, the Merced river became a mountain torrent and in the course of centuries eroded its channel to a depth of 1800 feet below Glacier point. Two glacial epochs followed, with a period of mild climate intervening. The glaciers left the valley a glacial lake, which was gradually filled to the present level of the valley floor by sediment brought down by the Merced river and Tenaya creek. Glacial specimens gathered at Camp Curry form the only collection in existence illustrating the Yosemite ice age.

For Rent

4 Room Cottage, with bath.
$6.00 per month including water.
Enquire of W. W. Dunham,
64 North Central avenue.

NOW IS THE time to make up your

Trays

We are in a position to sell you your trays at a **Better Price** than you can possibly obtain by going elsewhere.

Peace Pageant a Success

A Pageant of Peace was held at the Greek Theatre, August 3, under the auspices of the department of physical education. The following prologue was composed by one of Campbell's former High School girls and a Phi Betta Kappa graduate of the University of California, Miss Alice Joy. Miss Joy also wrote the scenario for this beautiful pageant.

PROLOGUE

(The Spirit of America speaks)

When Freedom, wearied of a world oppressed,
Sought a new land to rear a race of men,
Brothers, in equal liberty enjoined,
She dared the sea, and found a western shore
And set her standard in the wilderness.
The wilderness now blossoms as the rose.
America men call me; and the name
Kindles in every heart a leaping flame
Of love, and hope, and courage to fulfill!
The hope: to rear a nation without shame.

Now the old-world, shrieking in nightmare's clutch
Grapples old sins that rise to haunt her night.
I stand at peace amid my fruitful fields,
Horrorstruck, gazing on a world in flame.
Prepare! Prepare! men shout. Prepare for what?
To write my name in blood across the time?
To crush the nations that have borne my sons?
To build an obsolete empire in the west,
Betrussed by arms and rich in stolen gains.
Ha! If for this Freedom hath nurtured me,
My promise were but mockery of men.
Europe is haunted by a vision dread.
A vision haunts me too,
There is a strength stronger than strength of guns,
A light clearer than that of bursting bomb,
A peace more sure than balance of armed power.
Oh Mother Freedom, teach me!

Usual Fate.

Coquettes are like weather vanes—only fixed when they become rusty.—Chicago News.

We handle nothing but the very best Government Inspected Meats

Campbell Market

Campbell California

A. S. Gilson, Prop.

Our Meats are good

MILK is pure when it enters the bottle. When it is poured out of *our bottle* it is still pure.

We have adopted

The San Lac Seal
—IT KEEPS MILK PURE.

It ably protects the milk—pure when it enters the bottle—from shifting dust, contact with finger or fork and from all germs.

The San Lac Seal has an ample finger hold that is *not* the part that touches the milk but which extends over and protects the mouth of the bottle.

Send us a postal and we will send a man to explain it without your incurring any obligation.

DADDY'S EVENING FAIRY TALE

by MARY GRAHAM BONNER

COPYRIGHT BY THE AUTHOR

WISH SAVED THE RACCOONS.

"Mother Raccoon believed strongly and firmly in Fairies," said Daddy, "and she used to tell the little 'Coons (for they are called that almost as often as Raccoons by each other) Stories of the kind Fairies and their games in the woods and of the wonderful Fairy Queen and her Magic Wand.

"But Daddy Raccoon was a funny old soul. He used to enjoy sitting up in the very top of a tree without any leaves and talking about the narrow escapes from being killed that he had had.

Daddy Raccoon.

"Now, Mother Raccoon didn't think it was very nice or cheerful for Daddy Raccoon to always be talking about such sad and dangerous things and so she used to tell her Children Stories of the Fairies. All the little 'Coons of the neighoorhood would come to hear Mother Raccoon's fine Stories, and they would all curl up on the old dead branches of a very, very tall tree which Daddy Raccoon had picked out as his special home.

"One day Mother Raccoon was just about to start telling one of her Stories when Daddy Raccoon saw all the Children around her.

"'Now this afternoon,' said Daddy Raccoon, 'I want to take all those silly little 'Coons and show them how they can become brave big 'Coons like I am.' And he thrust his tail this way and that with an air which said, 'I'm certainly one of the finest, bravest Animals anyone could hope to be like.'

"All the little 'Coons looked very mournful when they heard that they were to be taken off to learn how to hunt in the swamp nearby. They were always very much frightened when they went near the swamp, for they had often heard the sound of a big gun, or had seen a dangerous Man with a gun over his shoulder getting in behind the bushes.

"They began to wail and yell, but Daddy Raccoon was firm and as he was the head of the house—or rather the big tree without any leaves—Mother Raccoon had to let them all go.

"But as they were following Daddy Raccoon, she called out to them, 'If anything happens to you wish very hard that you will be all right and the Fairy Queen may possibly be near by and will grant you the wish.'

"Daddy Raccoon sniffed with scorn at such a remark, but he said that Mother Raccoon was such a sweet old dear she even thought well of the Rabbit family—and so she was apt to think so much of the Fairies in the same way.

"And off they all started. Some of the little 'Coons were rather proud at going off to hunt in the swamp and really pretended they were tired of Fairy Stories and were glad that Daddy Raccoon had thought it was time for them to grow up.

"Soon they reached the swamp and in they went to hunt for food to last them many days as Daddy Raccoon had said.

"They did just as they were told and were beginning to be very good hunters and finding just how to pick out the best parts of the swamp—when suddenly—an awful bang was heard near by.

"Oh, if Any Little Fairy Is Hovering Near."

"'Oh, dear; oh, dear,' shouted the little 'Coons.

"'Do be quiet, or they'll know where we are,' said Daddy Raccoon.

"The second bang sounded very much nearer and they all trembled, when one little 'Coon said, "Oh, if any little Fairy is hovering near—please tell the horrid Man with the gun to go away.' And, would you believe it, that Man was heard to say:

"'Well, I guess they're all away for the day and I won't try to catch Raccoons until tomorrow.' Then Daddy Raccoon took all the little ones back to the old tree where Mother Raccoon was sitting curled up, shaking with fear while waiting.

"'Tell them all the Stories you want to,' said Daddy Raccoon, 'for one of your Fairy friends saved all our lives and whispered to the Man with the gun to go home!'"

Use for Extra Legs.

Small Elmer had drawn the picture of a dog and a cat on his slate.

"Why, Elmer," said his mother, "your cat has six legs instead of four."

"Yes," replied the little artist, "I gave her two extra so she could run away from the dog."

The Remaking of Mindanao

MORO DATTO AND RETAINERS

THERE was one rich and unruly realm the Spaniards were glad to rid themselves of following the battle of Manila bay. The huge Island of Mindanao, pronounced as though spelled Mind-a-now, known in the Philippines as Moroland, had the reputation of being largely unconquered, as much by the military as by the missionaries. The Moros clung to their religious beliefs as tenaciously as they opposed Spanish domination in government, writes Monroe Woolley in the Utica Saturday Globe.

But the Moro archipelago today is not what it was when we first took up stewardship there. This means that it is not the unconquerable empire it was when the Spanish essayed to rule and run it. For a long time we sought to make the Moros obedient by whipping them—by killing them off. Hundreds, thousands of them, were slain in periodic campaigns, yet the fiery Mohammedans lost no opportunity to treacherously murder our troops and officials at times when pacification seemed apparent.

Military operations failing to a considerable degree, and mindful of the hopeless task of the Spaniards, another method was devised to win the people to new government and to new ways of living. At first the Philippine government smoked a peace pipe with the sultans and dattos, chiefs of community factions, seeking in this manner to make itself popular with the masses. As much good will as possible was thus literally bought. Costly gifts and junketing trips were bestowed on the tribal chiefs, and they were fawned upon as loyal subjects are wont to do with royalty. Later, brute force was wholly abolished. Kindness and diplomacy were finally substituted therefor, and with this enlightened new system we are gradually and thoroughly remaking Mohammedan Mindanao.

Known to and thoroughly explored by white men for centuries past, Mindanao is today just beginning to be lifted from a savage past into the limelight of civilization. The rich realm has never been exploited because the inhabitants were always hostile to any outside interference. Mindanao has a larger colony of American planters, engaged mostly in hemp cultivation, than any other spot in the islands, notwithstanding that the people there have always been hostile to trespassers. Many of these have been wantonly murdered, but the fatality list is growing less right along, an evidence that the people are being converted to a new order of things. Many of these brave Americans started business on what they saved from a soldier's wage, and today not a few of them are Oriental nabobs.

Responding to Education.

For centuries the Moro thought the only kind of effective government was that having force behind it. To be kind to him, in his opinion, meant that you feared him. But to be kind, with a means of making kindness acceptable through a standing military force, has completely wrought a change in the warlike people. Under good leaders the Moros are good people; under bad ones they, too, are bad.

The Mohammedan religion teaches that to slay a white man, or a Christian, is a sure way to get to heaven. Therefore, in Spanish times, and during our early occupation, fanatical Moros used to run amuck, chopping down as many foreigners as they could with their wicked knives. Often it has taken a dozen bullets, well-aimed from a high-power army rifle, to kill the crazed followers of the Koran. All Moros hate pork as a bull does a red flag, and the military officer who placed the dead body of a fanatic inside a pork carcas and strung the two up in the plaza for the inspection of others effectually kept "running amuck" within bounds in his territory.

But today the Moros are laying aside their war krises and spears, are discarding their tight-fitting, gaily colored costumes for modern dress, similar to the Filipinos, and are sending their children for the first time to public schools. A decade hence there may be Moro professional men, such as lawyers, doctors and scientists.

A committee of Moro chieftains who went to Manila recently to meet Resident Commissioner Manuel Quezos of Washington, himself a Filipino, told the commissioner that schools were intensely popular, and asked him to say to congress that as long as that body was disposed to furnish school books that the Moros themselves would furnish the schools and the scholars. Datto Piang, one of the powerful chieftains, has himself erected two costly schoolhouses in Mindanao solely at his own expense. A Moro doing anything of this sort in olden times would have been hanged by his own people.

NATIVE BASE BALL TEAM

Baseball Has Helped.

Baseball has helped wonderfully with the Moros, as it did with the Filipinos, to cement affections for the Americans. It is claimed by a learned Filipino who recently toured Mindanao that in two decades the visitor in Moroland will not be able, so far as dress and manners are concerned, to distinguish a Moro from a Filipino. No American baseball fan really knows what fun is until he is privileged to see a hotly contested game of ball between Filipinos and Moros and gives an attentive ear to the game vernacular as it is spoken by our wards in the excitement of the sport.

With the awakening to civilization the Moro is acquiring some chivalry. One of the sultans thought he had reached the acme of politeness when he asked the popular daughter of one of our ex-presidents, at the time visiting his palace, to become No. 1 in his harem. Of course, there was a blushing declination, at which the dusky ruler was probably chagrined. But the incident goes to illustrate that the American, as well as the Christian Filipino, is for the first time making himself and his institutions acceptable to the remade Mohammedans of our farthest-flung frontier.

danao, with the Sulu archipelago—the Mohammedan empire—is well worth reconstruction, and it is perhaps this fact which has made us so persistent.

Largest of Philippine Islands.

Mindanao itself is the largest island by far in the entire Philippine archipelago. It is about the size of our own state of Mississippi, and is bigger than Indiana or Ohio. It would make seven states like New Jersey, and is by far much larger than several of our Atlantic coast states combined. To be precise, it has an area of 46,721 square miles.

In ancient times the Moros had little, if any, business sense. They had a woeful lack of the appreciation of money. To overcome their antiquated ideas of trade we have established markets for them in the leading towns where they meet to buy and sell. Some day Mindanao will be one of the leading countries of the world for the production of rubber. The rubber tree grows wild there in great profusion. Although the industry is as yet undomesticated, exports from a single locality have reached nearly 1,000,000 pounds in a year. The island also produces much hemp, as well as tapioca, cocoanuts and other tropical fruits.

We have been successful in giving railroads to that part of the Philippine archipelago occupied by the Filipino, even though foreign capital had to furnish the money, but we have yet to lay the first steel rail in Mindanao, the greatest and richest of the islands of our insular frontier. Borneo, distant only a stone's throw from Zamboanga, Mindanao's metropolis, is far ahead of Moroland in everything save natural wealth.

HAS LUTHER'S WEDDING RING

Precious Relic, Authentic, That Is in the Possession of New York Woman.

The wedding ring of Martin Luther's bride is one of the treasured possessions of Mrs. Hildegard Pinkert, wife of Maximilian Pinkert, who has charge of the German branch of St. Bartholomew's church, 209 East Forty-second street, and is also superintendent of the Seamen's institute, in South street, says a New York dispatch to the Detroit Free Press.

It bears the inscription, "D. Martino Lutheros—Catherine V. Bora, Den 13. Juni, 1525."

Doctor Luther met Catherine von Bora at the home of the duke of Saxony after the convent of which she had been a member had been dissolved. They were married soon afterward by Doctor Bugenhagen, Luther's closest friend.

The ring is quite large and fits the thumb of an ordinary hand. It is set with a brilliant ruby. It had been Luther's personal ring, given to him when he was ordained.

For 400 years the ring remained in possession of the Anhalt-Bernburg family of Leipsic, of whose family Luther's bride was a member and from whom Mrs. Pinkert is descended. For 100 years it was in possession of that branch of the family of which the wife of Rev. N. C. Walters of St. Luke's church, Leipsic, was a member. A few years ago she gave the ring to Baroness von Georgi, her niece.

There has been a tradition that the ring should never be worn except by the eldest daughter of the direct descendant; also that it should be worn only on the hand of the daughter who became the wife of a clergyman. Baroness von Georgi, although the eldest daughter, gave this ring to her sister, Mrs. Pinkert, last summer when Doctor and Mrs. Pinkert visited the old home of Waldenburg, near Leipsic.

Doctor Pinkert, desiring to be assured of its genuineness, consulted Carl Jensch of the Leipsic institute of art, and he gave it as his opinion that it was genuine.

This ring was referred to by H. Noel Humphreys, an authority, in an article in the Observer in February, 1862, in which an illustration of it appeared. He described it as the betrothal ring, but the Pinkerts have always understood that it was used at Luther's marriage. He says:

"The betrothment ring of Luther, which belonged to a family at Leipsic as late as 1817, and is doubtless still preserved with greatest care as a national relic of great interest, is composed of an intricate device of gold work, set with a ruby, the emblem of exalted love. The gold device represents all the symbols of the passion. In the center is the crucified Savior, on one side the spear with which the side was pierced and the rod of reeds of the flagellation. On the other is a leaf of hyssop."

Lights for Battlefields.

The secretary of war has directed the engineer corps of the United States army to make an exhaustive study of searchlights, flares, star bombs and such other lights as the Europeans are now using in war. According to the Army and Navy Journal, searchlights are for obvious reasons kept dark until the field artillery has ceased firing and the enemy is charging. To illuminate a field over which the enemy is to advance, star bombs and flares are also used. Flares, which are merely modified fireworks, are like the familiar red, white and blue lights used in Fourth of July celebrations to illuminate streets and parks. Sappers go out in front of the trenches with flares, which are then connected with the headquarters of the officers in command of the first line, who by setting them off at intervals throughout the night, can keep the battle front continually lighted. Star bombs are also adaptations of modern fireworks. They are shot from mortars into the sky, where for twenty minutes they will give off an intense light over a wide circle of the surrounding country. Before one bomb dies out another is shot into the air. A kind of star bomb, shot into the sky like an ordinary rocket, is used by both armies for signaling at night. It is with such lights as these that our engineer corps is now conducting experiments at the barracks in Washington.

Diamond Oldest of Riches.

The discoverer of diamonds is unknown. From references in Exodus it is apparent that the diamond was a precious stone in Egypt in those early times; and even before that it was known in India, where probably it was first obtained. The name is derived from the Greek word "adamas," meaning "unsubduable."

From Pliny, a writer of the first century, we learn that the diamond was regarded as the most valuable of all things, and only a few kings ever could afford to buy them. But as no means of artificial polishing had been discovered the stone depreciated in value, so that the ruby and the emerald became more precious. The discovery by Ludwig von Berquen, in 1476, of a mode of polishing and cutting it at once returned this gem to the first place among precious stones.

A Misleading Audience.

"Why doesn't young Bliggins make more progress in his studies?"

"He doesn't get the proper kind of encouragement. His father doesn't take any interest in what the boy knows about the classics, but is enthusiastic about the way he can play accompaniments on the banjo."

Along The Isonzo

RAILWAY BRIDGE IN ISONZO VALLEY

CONTRARY to popular belief, the Isonzo river, along which the Italians made their first attack against Austria and where their lines held firmly against the vigorous Teutonic offensive, is not the boundary line between the two countries, but lies wholely within Austrian territory, from two to twelve miles from the border. Its source is near the juncture of the Carnic and Julian Alps, on Mount Terglou, the loftiest peak of the latter range, and it follows a tortuous channel for 75 miles, emptying into the Gulf of Trieste, says the National Geographic society bulletin. So turbulent are the Isonzo's waters that the river is practically unnavigable, except for the few miles of its estuary where its course is through a rapidly extending delta. On its way through the alluvial plain it is known as the Sdobba, whose mouth is less than 20 miles from the important Austrian port of Trieste lying to the southeast.

The Isonzo is the principal river of the country and crown-land of Gorz and Gradisca, which have an area about equal to that of Rhode Island. This principality and two other crown-lands, Istria and Trieste, constitute Austria's kustenland (coast land).

Was Highly Productive Valley.

Before the devastation wrought by the war, the valley of the Isonzo was a highly productive region, agriculture and vine-growing being the chief occupations of that part of the population (mainly Italian) which was not engaged in silk-worm culture.

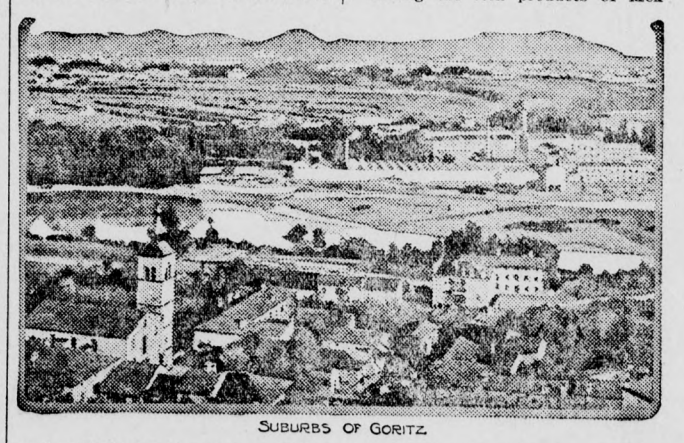
The leading city of the Isonzo valley is Goritz (Gorz), with 30,000 inhabitants, known as the Nice of Austria on account of its popularity as a fashionable resort. Its growth coincides with the decline of Aquileia, now an insignificant town of less than 3,000 people, situated to the southwest, six miles from the sea, but which was reckoned the ninth city of the Roman empire and a great seaport during the closing years of the fourth century.

It is about 20 miles from Goritz to the Italian frontier. The place is a center of trunkline railways to the Italian cities of Venice in the southwest and Undine in the northwest, and to the Austrian cities of Trieste in the southeast and Klagenfurt in the north. The situation of Goritz is a picturesque one, greatly enhanced by the rare pleasure gardens that have been called into being by the winter guests. It is built on the left bank of the Isonzo river. The worn rocks of the old castle ruins of the counts of Goritz dominate the city from the hillside. The castle is now used partly as a barracks and partly as an arsenal. The cathedral, built in the fourteenth century, is another interesting monument to the city's past.

Where Theodoric Defeated Odoacer.

The fighting which is now occurring on the Isonzo recalls the great battle of the Isontius (Isonzo) in the fifth century, where the Roman emperor Odoacer met signal defeat at the hands of Theodoric, the Ostrogoth. The vanquished leader was driven back to Ravenna, where, after a protracted siege a truce was agreed upon. During the parley Odoacer fell before the treacherous Ostrogoth, who clove his enemy from shoulder to flank with a broadsword.

One of the most interesting natural phenomena of the Isonzo district is the short Timavus river, which empties into the Gulf of Trieste five miles from the mouth of the larger watercourse. The Timavus gushes from a mountainside, fullformed, in three streams of sufficient volume to float small vessels at the very source. In Virgil's day, according to the description in the Aeneid, the Timavus rushed from the rocks in nine streams. The river is supposed to be a continuation of the equally unique Reka, whose waters disappear in the grottoes of Sankt Kanzian, some 20 miles southeast of the mysterious Timavus.



SUBURBS OF GORITZ

MAZATLAN IS A BUSY PORT

Rich Products of Mexico Are Shipped From the Pacific Coast Metropolis.

Mazatlan, Mexico's metropolis of the Pacific coast, reported to have been the scene of an unprovoked attack upon officers and men from the American gunboat Annapolis, is thus described in the National Geographic society's war geographic bulletin:

The north entrance to its harbor, marked by a lighthouse perched on the crest of an eminence called Cerro del Creston, making it one of the loftiest guides to navigation in the world, Mazatlan is the chief entrepot for one of the richest mining sections of the southern republic. It not only exports the gold and silver from its own immensely wealthy state of Sinaloa (estimated by some experts to have the most valuable mineral deposits in Mexico) but it also handles the ore shipments by sea of Zacatecas and Durango.

The city, which has a population of 20,000, is situated on a small peninsula opposite the Bay of Olas Altas (High Waves), and is surrounded by cocoanut groves. It is a six days' voyage by steamship from here to San Francisco, the Mexican port being 225 miles east of the southern tip of Lower California. The distance from El Paso, due south, to Mazatlan is about the same as from St. Louis to New Orleans.

The aspect of the territory adjacent to Mazatlan is little affected by the prosperity of the report. The Indians live in the same type of huts which they have occupied since the Spanish conquest and perhaps for centuries before that. The strip of lowland along the shore has a tropical climate, with an abundance of rain. Beyond this verdant margin to the East rises the towering, thickly wooded Sierra Madre range, extending for hundreds of miles to the north and south.

Among the rich products of Mexico's fertile fields, undersea caves and riven hills which find their way to the outside world through the Mazatlan gateway are rubber, gums, dyewoods, silver, copper, gold, lead, pearls, tortoiseshell, salted fish, and cabinet woods. The city's manufacturing activities include saw mills, cotton factories and rope works.

Fourteen years ago Mazatlan was almost depopulated by a frightful epidemic of bubonic plague which surpassed in severity some of the most terrible ravages of the "black death" in Europe during the middle ages. According to one authority only 4,000 people out of a total of 18,000 were spared, and more than a thousand houses were burned in an effort to stay the march of the disease. During the last decade sanitary conditions have been improved greatly.

Strategy.

"Nora has just dropped another plate," said Mrs. Twobble.

"Well, my dear," replied Mr. Twobble, "suppose you go into the kitchen and drop a hint to that effect that she must not break any more china?"

"Evidently you don't know how to manage Nora. If I lead her to believe that we rather enjoy having her break a plate occasionally, I think she will be more careful."

Can't Tell.

"Animals are so different," said the city boy in the country.

"How so?" asked the farmer.

"Well you see when the dog wags his tail he's pleased, but when the cow wags her tail I can't tell if she is pleased or it's only flies."

Storage in Cato's Day.

Storage of crops against a favorable time for selling appears to be no new idea. We find a grain of sound advice in Cato's writings 2,000 years ago:

"Let your buildings be proportioned to your estate. It is fitting that the farm buildings should be well constructed, that you should have ample of cellars and wine vats, and a good supply of casks, so that you can wait for high prices, something that will redound to your honor, your profit and your self-respect."

Evidently the problem of getting the best prices was then, as now, a question of providing storage facilities, either on the individual farm or for a group of farms, such as were included in most Roman estates.—Country Gentleman.

Called Prettiest Judge.

Miss Reah M. Whitehead of Seattle is said to be the prettiest judge in the United States. She is one of the five judges of the city court of Seattle, and though when she was elected it was expected that she would handle cases involving women and children, so far her work has been about the same as that of her four colleagues. The first batch of criminals consigned to her court comprised five men, three of them accused of burglary.

Judge Whitehead began her career as a stenographer in a lawyer's office. Within a few months she began to study law at night. After being admitted to the bar she was chosen a deputy prosecuting attorney

A WELL-KNOWN WOMAN SPEAKS.

Los Angeles, Cal.—"It gives me great pleasure to add my testimonial to the many you have already. I cannot say enough in praise of your great medicine, 'Favorite Prescription.' Had used several different medicines for woman's disorders but found none that did me any good until I learned of yours. Using yours I got quick, excellent results. Will always sing the praises of Dr. Pierce's medicines. My mother and sisters also used them and found that they were all that was claimed for them. It is always a great pleasure to tell a suffering woman of these remedies, and I always find that whoever I tell of the good they will do is afterward ready to join in the praise. May I always be in reach of them."—MISS MATTIE LOU CARTER, 1514 S. Ardmore Ave.

Every woman who has reason to believe that backache, headache, pain, low spirits, sleeplessness, irregularity or a catarrhal condition is caused by a derangement of the womanly functions, owes it to herself to speedily overcome the trouble before a general breakdown causes permanent prostration.

Dr. Pierce's Favorite Prescription is a non-alcoholic remedy that any ailing woman can safely take because it is prepared from roots and herbs with pure glycerine, containing tonic properties of the most pronounced character.

FREE.—Dr. Pierce's Medical Adviser, cloth-bound, sent free on receipt of three dimes (or stamps) to pay expense of mailing *only*. Dr. Pierce, Invalids' Hotel, 663 Main Street, Buffalo, N. Y.

DADDY'S EVENING FAIRY TALE

by MARY GRAHAM BONNER

COPYRIGHT BY THE AUTHOR

COCOANUTS AT THE PARTY.

"The Fairies gave a Party for the Gnomes the other day," commenced Daddy as he saw both Nick and Nancy were all ready to hear their usual bedtime story.

"And their chief pride in the Party was that they only needed one sort of food and drink—at least one kind did for both."

"That sounds very mysterious, Daddy," said Nick. "How could that be?"

The Fairy Queen Took a Bite.

"You see," continued Daddy, "they invited the Cocoanut family to come to the party to be the food and drink for the Fairies and their Guests, the Gnomes. Well, the Cocoanut family were as proud as proud could be.

"Old Professor Cocoanut, who sees all the little Cocoanuts grow up in just the right way began to talk to them. This is what he said in Cocoanut talk,

"'Little Cocoanuts, now you see how important it is to be brought up well. Here are all our family going to a splendid Party given by the Fairies for the Gnomes—fine little creatures they say those Gnomes are.

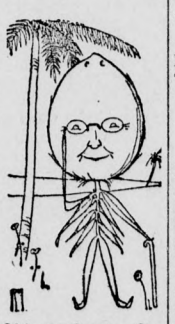
"'Well, to continue—which means to go on,' for Professor Cocoanut always stopped to explain what everything meant—'you see we are worth while to have at a Party. They don't need to have food and drink all separately—here we are both food and drink. But now it is time to be off, and they are going to take our mats along, too, for they have invited some of the great big strong Brownies to take these mats off us. They are going to have quite a time doing it, but they are glad to be of service to the Fairy Queen.'

"As Professor Cocoanut finished his speech along came a great big Caravan made of birch bark. It was drawn by one hundred Elves. And as soon as they came to the Cocoanuts they all hurried them into the Caravan.

"The Cocoanuts had never been off on a trip before. To be sure many of their family had gone to the cities, to shops and then to houses—but they were having such a noble trip! To be given as food and drink to the Fairies, Gnomes, Elves and Brownies! Well, they were so happy.

"After a rather rough but exciting trip they all reached the woods where the Dinner Party was being given. There they saw the strong Brownies with their sharp-pointed sticks ready to make two eyes in each cocoanut—one for an air hole and the other for the Fairies to drink out of. And they saw the still stronger, bigger Brownies with their axes to take away the thick mats the Cocoanuts wear around them.

"And then the feast of the Fairies, Elves, Gnomes and Brownies did have. Those who had worked so hard said they had never had such a fine reward, and the guests were happier than they had ever been to have such a new kind of party. As for the fairies, they thought it was a splendid idea to have to take drinks out of the Cocoanuts, and then eat delicious little pieces of nut meats out of them.



Old Professor Cocoanut.

"And just before Professor Cocoanut was all eaten up, the Fairy Queen took both a drink and a bite out of him, so he was the proudest old professor you ever heard of in all your days."

CHICKENS PERCHED ON ROOST

Tommy Figures It Out That Some Would Be Perchers and the Others Would Be Roosters.

"What is a roost, dad?" asked Tommy.

"A roost, my son, is a pole upon which chickens sit at night," replied his father.

"And what's a perch, dad?"

"A perch is what chickens perch on."

"Then, I suppose, dad, a chicken could roost on a perch?" came the further inquiry.

"Of course," was the smiling reply.

"And they could perch on a roost?"

"Why, y-yes," answered dad.

"But if chickens perched on a roost, that would make the roost a perch, wouldn't it? But if, just after some chickens had perched on a roost and made it a perch, some more chickens came along and roosted on the perch and made it a roost, then the roost would be a perch and the perch would be a roost, and some of the chickens would be perchers and the others would be roosters, and—"—Tit-Bits.

In Australasia — New South Wales, Victoria, South Australia, Queensland, Tasmania, Western Australia, New Zealand, Fiji, Papua, and islands in the Pacific.

NEW MODERN DANCING.
E. Fletcher Hallamore, the leading Dancing Expert and Instructor in New York City, writes: "I have used ALLEN'S FOOT-EASE, the antiseptic powder to be shaken into the shoes, for ten years, and recommend it to all my pupils." It cures and prevents sore feet. Sold by all Drug and Department Stores, 25c. Sample FREE. Address, Allen S. Olmsted, Le Roy, N. Y.—Adv.

Oil Surplus Is Waste.

One of the causes of the lubricant working out from the differential case between the axles and tubes of the automobile to the brakes and wheels is due to using too large a supply of oil or grease in the differential case. It is not necessary to completely fill the housing, only to a point where the large gear will dip into the lubricant. If the leakage continues, fit felt washers at the differential and wheel ends of the axles.

As the wire employed for ignition purposes is composed of a large number of fine strands of copper, it is important that they should be soldered to a terminal or connection to avoid the possibility of any of the strands coming in contact with metal and causing a short circuit.

Send 10c. to Dr. Pierce Invalids' Hotel, Buffalo, for large trial package of "Anuric" for kidneys, cures backache.

His Unsatisfied Yearn.

"I have long desired to be a sheriff and capture a blonde wood nymph who in form and trimmings resembled the Venus de Milo," confessed J. Fuller Gloom. "Two obstacles have prevented. I couldn't be elected sheriff if there was no other candidate in the race against me, and there are no blonde wood nymphs running loose anywhere except in the imaginations of the correspondents."—Kansas City Star

CALOMEL SELDOM SOLD HERE NOW

Nasty drug salivates, makes you sick and you lose a day's work.

Every druggist in town—your druggist and everybody's druggist has noticed a great falling-off in the sale of calomel. They all give the same reason. Dodson's Liver Tone is taking its place.

"Calomel is dangerous and people know it, while Dodson's Liver Tone is perfectly safe and gives better results," said a prominent local druggist. Dodson's Liver Tone is personally guaranteed by every druggist who sells it. A large bottle costs 50 cents, and if it fails to give easy relief in every case of liver sluggishness and constipation, you have only to ask for your money back.

Dodson's Liver Tone is a pleasant-tasting, purely vegetable remedy, harmless to both children and adults. Take a spoonful at night and wake up feeling fine; no biliousness, sick headache, acid stomach or constipated bowels. It doesn't gripe or cause inconvenience all the next day like violent calomel. Take a dose of calomel today and tomorrow you will feel weak, sick and nauseated. Don't lose a day's work! Take Dodson's Liver Tone instead and feel fine, full of vigor and ambition.—Adv.

DEADLY ENEMIES OF BIRDS

Snakes Climb Trees and Capture Fledglings in Nest, While the Parents Are Helpless.

Some enemies of the birds are satisfied to take chances on outrunning their prey on the ground or catching them in an air pursuit. In the birds' war for existence these enemies are the land forces and the air squadrons. Other foes make stealthy attacks on the nests in the trees, destroying the eggs and devouring the young fledglings. They are the submarines, and the stealthiest and meanest of the lot is the snake.

The snake's ability to climb trees makes him a deadly foe to birds. The reptile will crawl out on a limb and capture his prey while the parent birds flutter about powerless to prevent the slaughter.

Of all the reptiles the common blacksnake is the most destructive, and they will swallow a full-grown bird. The skull of a snake's head is put together loosely and will stretch to an extraordinary size. This makes it possible for the snake to swallow a bird much larger than his own head.

Before he devours his prey the snake covers it with a slimy saliva and squeezes the bird out long and narrow with his jaws to make it easier to swallow. Bullfrogs have been known to swallow birds, too, but they are not so destructive as the submarine snake. They cannot trap the birds in their nests in the trees.

Making the Child Beautiful.

Every mother desires that her child shall be beautiful; but beauty on the outside is born of health on the inside. The same is true of beauty of disposition, or of what we are wont to term "goodness" in the child. It is exceedingly difficult for people of mature years, possessed of some degree of self-control, to be bright, cheerful and amiable with a body suffering with ill health. How much more so for the child.

Every child may not be endowed with perfect symmetry of face and figure, but the sunny disposition, the clear complexion, the rosy cheeks, the gleaming eye, the ruby lips, the pearly teeth, the plump form, together with perfect poise of body, which all may cultivate, will lend even a greater charm.

Early beginnings count for much in matters pertaining to health, as with all other things connected with child culture. Upon the right treatment of the little babe during the first year depends much of its subsequent well-being.—Mrs. E. E. Kellogg, in Good Health.

Celtic Revival.

The so-called Celtic revival is practically the attempt to "revive" and keep alive the Irish language. Irish is the classic Celtic language, and we are better supplied with linguistic material for its study than is the case with any other Celtic dialect. The history of the language goes back 1,200 years. The Gaelic league, for the study and revival of Irish, was founded in 1893. It publishes a weekly journal, the Flaming Sword, and a monthly, the Gaelic Journal. In 1898 a festival was held, on the same lines as the Welsh Eisteddfod, called the Oireachtas, and was very successful, so that it has been held every year since. Most of the counties in Ireland also have their local Gaelic festivals each year. The literary output of the movement has been tremendous, but the language itself is very difficult in spelling and phonetics.

Married in Haste.

The old-time editor of Georgia was usually the mayor as well. He was also justice of the peace, conveyancer and real estate agent, deacon of the church, leading lawyer and head of the building and loan.

As one of these editors was writing a two-column editorial on the tariff a Georgia couple came in to be married. The editor, without once looking up, without once slackening the steady movement of his pen, said:

"Time's money. Want her?"

"Yes," said the youth.

"Want him?" the editor continued, nodding toward the girl.

"Yes," she replied.

"Man and wife," pronounced the editor, his pen traveling smoothly and rapidly. "One dollar. Bring a load of wood for it—one-third pine, balance oak."—Pittsburgh Dispatch.

Use Trailers as Hospital Cars.

Instead of continuing to convert passenger automobiles into ambulances, as in the beginning of the war, the British military authorities now use almost exclusively trailers, which are attached to the touring cars by means of ordinary drawbars. An anchorage for such trailers is attached to every touring car in military service, at very small expense, so that any one of the cars can instantly pick up an ambulance and convey it to the hospital at the rear. The trailer has been of great service to the hospital corps, and is now manufactured in quantity by the inventor. The first car of this type was made in November last, and thoroughly tested before being submitted to the war office.

Breaks Leg on Tomato Vine.

Tripping over a tomato vine in his garden, where he was working, William L. Hedrick, a California pioneer and a prominent real estate man of Pasadena, Cal., fell and broke his right leg near the hip.

Because of his advanced age and his weight his family and physician had great difficulty in removing Mr Hedrick from the garden to a truck a fence having to be torn down first

"GIBRALTAR OF THE BALTIC"

Powerful Fortress of Sveaborg, Guarding the Gulf of Finland, Has Been Frequently So Called.

After more than 18 months of naval war upon the Baltic sea between the fleets of Germany and Russia, the first successful shot has yet to be fired against the mighty fortress of Sveaborg, which guards the neck of the Gulf of Finland, and the water approaches to the Russian capital, says a bulletin issued by the National Geographic society at Washington. Sveaborg, best known as the "Gibraltar of the Baltic," powerfully secures its holders' control to all the wide basin of the Gulf of Finland, thus giving them a most important base for disputing the control of the northern inland sea. It was the acquisition of this stronghold that constituted the strongest impelling force in Muscovite politics toward the conquest of Finland from the Swedes.

Across the neck of the gulf from Sveaborg lies Reval, the seat of other powerful shore defenses and of important Russian navy yards. These two points block the way from the Baltic against any naval power almost as securely as the forts Kilid Bahr and Chanak Kalessi blocked the English ships at the Dardanelles. Reval is situated on a sharp bay at the northeastern gulf shore of Estonia. Sveaborg fortress stands just before Helsingfors, the capital of Finland.

There are hundreds of small, thickly wooded islands strewn over the coastal waters around Helsingfors. It is upon a group of seven of such islands, which are larger than their neighbors, that the almost impregnable Sveaborg fortress is built. Moreover, small redoubts and batteries are well concealed in several of the outlying islands which surround, like a thinly-flung skirmish line, the fortress near the coast.

Many a vain seaward attack has shattered against Sveaborg's defenses in bygone days, and in recent years Russia has brought the strength of the place up to Twentieth Century requirements. It is said that more than 1,000 guns are mounted here and several thousand soldiers are quartered in the fortress even in times of peace. During the Crimean war the allies attacked this point violently and without success. The story goes that English guns alone hurled more than a thousand tons of shot and shell into the fortress, almost without apparent effect. It has fallen only once, and then bribery is credited with victory and not the force of arms. It surrendered to the Russians without an effort at defense, surrendering at the same time that its garrison of 6,000 men laid down their arms and turned over their formidable defenses, the whole country of Finland.

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Murine Eye Salve in Tubes 25c. For Book of the Eye Free ask Druggists or Murine Eye Remedy Co., Chicago

Paid Big Price for Ram.

The price of mutton has gone up in Australia. When the Red Cross fund was being raised one wealthy sheepowner presented a ram to be sold by auction and the proceeds devoted to the fund. The ram was sold in Sydney. The auctioneer who wielded the hammer made an eloquent appeal to the pastoralists and others present to see to it that the ram brought a sum worthy of the object, and one that would live for ever in the history of these sales. The ram, which was appropriately named "Australia Day," was sold and resold 22 times, mostly in straightout bids, and when 2,000 guineas had been realized he was put up for final sale and knocked down at 200 guineas ($1,020)

Old Tree Still Fruitful.

Apples plucked from the oldest apple tree on the Pacific coast, in Vancouver, Wash., have been sent to the department of agriculture by a former horticulture inspector of the district. This famous tree is almost ninety years old and produced a fair crop of apples this year. The department will make reproductions of the apples in size, shape and color, and they will be returned and later handed over to the Washington and Oregon Historical societies, with photographs of the old tree and its history.

TO GUIDE TROOPS AT NIGHT

Prismatic Compass Is Declared to Be of Great Value to Military Commanders.

Leading troops across country by compass bearing with as much certainty by night as by day is made possible through the use of a prismatic compass just brought out in England. The name given this compass is due to the prism fitted to one side of the frame, although this is not the most important feature of the instrument. The dial, which is made of mother-of-pearl, has a center coated with luminous paint, and in addition to this there are luminous patches on the lid by which the instrument is readily sighted at night. When a night march is to be undertaken the instrument is opened and exposed to the daylight for half an hour. This is sufficient to make the dial center and sighting patches luminous for from six to nine hours. In the latest form of the instrument this exposure to daylight is unnecessary, owing to the use of radium, a substance that is always self-luminous.—Popular Mechanics.

HUSBAND SAVED HIS WIFE

Stopped Most Terrible Suffering by Getting Her Lydia E. Pinkham's Vegetable Compound.

Denison, Texas. — "After my little girl was born two years ago I began suffering with female trouble and could hardly do my work. I was very nervous but just kept dragging on until last summer when I got where I could not do my work. I would have a chill every day and hot flashes and dizzy spells and my head would almost burst. I got where I was almost a walking skeleton and life was a burden to me until one day my husband's step-sister told my husband if he did not do something for me I would not last long and told him to get your medicine. So he got Lydia E. Pinkham's Vegetable Compound for me, and after taking the first three doses I began to improve. I continued its use, and I have never had any female trouble since. I feel that I owe my life to you and your remedies. They did for me what doctors could not do and I will always praise it wherever I go."—Mrs. G. O. LOWERY, 419 W. Monterey Street, Denison, Texas.

If you are suffering from any form of female ills, get a bottle of Lydia E. Pinkham's Vegetable Compound, and commence the treatment without delay.

Attorney for said Administratrix, with the Will annexed.

Orchardists-ATTENTION

Irrigation Engineer with wide experience will consult free all orchardists, ranchers and men interested in alfalfa raising with view to the general increase of the productivity. Many men go on from year to year wondering why their acerage does not show a more profitable yield. I can tell you why and how you can overcome your difficulty—free. For interview, drop me card to "Engineer, P. O. Box 182, Campbell, Cal." and I will come to see you.

Four Killed In Auto Wreck

In one of the most terrible accidents in this vicinity for years, four prominent San Jose men were killed Tuesday evening when an automobile ran into the Southern Pacific train at Moulton crossing a mile out of Campbell. The dead are: Louis Montgomery, Byron Cottle, M. Terry Helm and W. H. Keaton. All of the men were on their way to Los Gatos to attend Odd Fellows lodge initiation.

They were riding in Byron Cottle's auto, coming south on the state highway and crashed into the side of the engine wrecking the auto and breaking several castings on the engine.

Residents near there hearing the crash phoned Dr. W. I. Merrill at Campbell who rushed to the scene, arriving there before Helm was dead. He was hurried to the county hospital a short distance up the road, but died before reaching there.

The fireman saw the approaching auto and the collision followed at the next instant. The train crew reports that the train was traveling about 35 miles per hour.

W. H. Keaton and Terry Helm leave dependent families to mourn their loss.

Stove with water-back for sale. Price $10.00. Miss Ruth Cowles, Sunnyside.

Palm Leaf Council will meet the 4th Saturday night during August and September.

Mrs. C. J. Ludwig went to Hollister yesterday morning for a visit with relatives and friends.

THE sporting instincts of Americans have been aroused more by the Deutschland than by anything else in recent years. Officially and nominally we are all neutral, but there was nothing in our neutrality which forbade admiration for the daring exploit of the German diver in crossing the Atlantic, and no law can prevent the hope that the submarine will reach Bremerhaven or some other port in perfect safety.

A similar feat by a diver of any other flag would have elicited similar approbation. Until the appearance in our waters of the Deutschland foreign submarines were thought of only as instruments of destruction, very often unnecessarily cruel in their mode of operation. It has now been demonstrated that underwater craft can be used for freight on a considerable scale, and as the Deutschland was solely engaged in merchant trade, our sympathies were decidedly in her favor, and our feelings averse to the thought of her being captured by the warships waiting outside the three-mile limit.

It is, of course, a long way from Baltimore to Bremerhaven, and in addition to the vessels which she has just eluded, she will have to face the possibility of capture by one or more of the many regular patrol ships which the allies are maintaining on the Atlantic.

Of this we can be certain, that no time will be lost in letting America know whether the Deutschland has been taken or whether she has made a home port. That it may be the latter is the wish of all in whom the sporting instinct is stronger than the bias of partisanship. —*Chronicle.*

Sargent--Parso

The wedding, Tuesday, of Miss Elizabeth May Sargent and Mr. George L. Parso, at the home of the bride's father, Mr. A. E. Sargent, on Hamilton avenue was a pretty and delightful affair.

The ceremony which took place at half past twelve, was performed by the Rev. W. H. Lloyd in the presence of the relatives and a few intimate friends. The bridal couple was unattended except by little Miss Helen Lloyd, who preceeded them with a flower basket.

Miss Lulu Pieper sang two numbers, "The Voice That Breathes O'er Eden" and "O Beloved, It Is Morn," accompanied by Miss Caldwell of San Jose, who also played the wedding march.

The bride and groom stood beneath a beautiful bell made of white carnations with a few pink astors and a clapper of pink hydrangea, while the words of the ring service were said. The bell was suspended in a bow-window from which white ribbon streamers, held by white doves, led to the chandelier. Feathery bamboo outlined the archway and the curtains at the back were sprinkled with flowers.

Tall flower baskets held large boquets of pink amaryllis, which with pink hydrangeas, were used in profusion thruout the rooms.

The bride was very charming in a gown of brocaded marquisette over ivory charmeuse, trimmed with silver lace, and a veil fastened with a wreath of orange blossoms. Her boquet was a shower of bride's roses and lilies of the valley combined with ferns.

A reception at one o'clock was largely attended by friends of both parties, who have lived here a number of years. Refreshments of pink and white ice cream, cake and punch were served.

The bridal couple were the recipients of many beautiful presents, both at the wedding and the several showers which preceeded, as they both have many friends who were glad to have a little part in their future home.

They left at three o'clock to take a train for Tracy, where they changed to their train for New Orleans, the first objective point in a three months' tour, including a trip thru the Canal and back, a visit in Jamaica, New York, Boston, the Adirondacks, Niagara, Chicago, Minnesota, the Canadian Rockies and many other side trips.

Upon their return, they will live in Mr. Parso's house on Hamilton avenue, and Mr. Sargent will make his home with them.

Mr. Sargent was assisted at the reception by Miss Alice Narrowmore, who has been a house guest for some time, Miss Isabel Silva, and Mrs. C. J. Ludwig. The Misses Laura and Margaret Blaine and Dorothy Ainsley served the ice-cream and Mrs. F. J. Bohrman presided over the punch bowl.

Out of town guests who were present at the wedding were Miss Alice Narrowmore, Miss Lula Pieper, Mr. and Mrs. A. S. Collins of Pacific Grove, and Miss Caldwell of San Jose.

Methodist Church Notes

Rev. Dr. W. M. Dudley, who, as a representative of the general Board of Education of the church, is assisting in the campaign for an adequate endowment for the College of the Pacific, will speak Sunday morning in the interest of this movement. No subscriptions will be taken at this time, but the friends of the college will be waited upon personally by the workers in the near future. Come and hear all about the efforts of the college by one who will make the story very interesting.

The pastor will give Sunday evening the second installment of the temperance story begun last Sunday. This is a true representation of real life as it must be lived by many so long as the drink habit holds its place in society. The pastor is telling this story to strengthen dry sentiment, and make dry votes.

The next Epworth League rally for this county will be held at First Church, San Jose, Thursday evening, August 17th. Attend the League meeting Sunday evening and hear all about it.

Good Work of Club

As many new residents have come to Campbell and vicinity in recent years, a great number of whom are patrons of the library and reading-room, it seems fitting, in view of the coming entertainment, to say a few words in regard to the work of the Country Woman's Club.

This organization is not a social club, neither is it a literary society solely, but is a corporation, formed under the laws of the state so that it can own property and transact business.

Thru the efforts of the club the ground where the library stands was purchased and the present building erected for temporary use. A fund has been created, which is added to from time to time with which to build a suitable library, having separate book-rooms and reading-room and other advantages.

The club keeps the building in repair, heated and lighted for the use of patrons, and pays half of the salary of the county librarian. In times past, it supplied all of the literature for the reading-room, but now the county library furnishes part of the magazines.

The Flower Fete, which will be held the first of October, has been planned to increase the building fund, and any assistance which is given toward making the entertainment a success, will be helping a public enterprise.

There will be a candy booth, and a home products booth, (jams, jellies, pickles, cakes, mince meat, etc.,) plants and bulbs for sale, and other features, besides the displays of flowers. Donations for any of these booths would be very gratefuly received. Any one of the general committee, Mrs. Warren Shelly, Mrs. Ralston Alison, Mrs. Ralph Hyde, Mrs. Leigh Saunders and Mrs. D. H. Cramer, will be very glad to give any information desired as to gifts or exhibits.

Big Day In League

Campbell Mission Leaguers will hold a debate with San Jose on Santa Clara varsity diamond next Sunday afternoon at 2:30.

This bids fair to be quite a pitcher's duel as both men slated for the job are unusually good and very well known Stewart, our dependable south paw, will be on the mound for Campbell, while "Babe" Rudolph will do the honors for San Jose. These pitchers will be supported by the best talent the country can afford, the lineup of Campbell being as follows: Stewart, pitcher; Kerber (formerly of State League) catcher; Prindiville (formerly of City League) 1st base; Wagner at 2nd base, Baritean (from Oroville—Trolley League) at 3rd, Silva short stop; Darling in left field; Pat Kennedy in center; and "Busher" Eddie Pierce in right. Last Sunday at Hollister our "Busher" was stuck in to pitch the latter part of the game and shocked the community by striking out three of the Mission Leagues "Ping Bodies"—

Arrangements are being made to handle about 2000 people at Santa Clara Sunday as San Jose and vicinity is more than hungry for some real baseball. Jakie Baumgarten will be the "Umps"—This official served in the Big Leagues for several years. Join the crowd and be there early.

Choice Skinner Seedling apples. 50c per box. Phone 28F5.

E. O. Evans is adding a touch of color to the bank building this week.

For Sale: Fine driving horse and buggy. Inquire of G. E. Atkinson.

Mrs. P. G. Keith is down from Berkeley looking after her business interests for a few weeks.

John Evans was taken quite seriously ill Wednesday evening but was reported some better yesterday afternoon.

Miss Ruth Lloyd, who underwent an operation for appendicitis Wednesday morning at Columbia hospital, is reported doing well.

All persons interested in the welfare of California homes are urged to attend a meeting of the dry federation, which will be held at the Methodist church, Monday evening at 7:30. Come and bring your friends and neighbors.

Cleaning Lace.

Lace that is too delicate to be washed in the usual way can be cleaned in this way: Make a strong soapsuds of some good soap and allow the lace to remain in it for several hours at least, although it is well to shake it out occasionally. A wide mouthed bottle is most convenient to handle. When the lace is thoroughly soaked let the soapy water out of the bottle and keep adding clean water until the soap has all been removed from the lace. Do not handle the lace at all; shaking the bottle will rinse it thoroughly.

If the lace is narrow wind it round a bottle that has been covered with a piece of soft flannel, and do not remove it until it is dry. If it is too wide to care for in that way dry it on a large cushion. First cover the cushion with a heavy towel, then pin the points of the lace in place and allow it to dry. It is better not to use steel pins on account of the danger from rust. When dry the lace will look like new.—Youth's Companion.

Famous Temple and Statue.

Since about the year 752 the grand ceremony of Kaigen, or "opening the spiritual eye of the statue," has been celebrated but five times at the temple commonly known as the Daibutsu of Nara, at Tokyo. The original statue has suffered grievously since 752. Once, in 855, the head dropped off. Since then it has suffered twice from fire, and upon each occasion the head was destroyed. The statue in its sitting posture measures fifty-three and a half feet, the length of the face being sixteen feet. The two Bodhisattvas flanking the Daibutsu are as high as thirty feet. The temple is 188 feet in frontage and 166 feet in depth and is known as the largest wooden building in Japan, though it is much smaller than the original, built 1,100 years ago. It was not built to protect the statue from being exposed to the weather, but the statue was made to enshrine as the chief figure of the temple.

Tool Chest Courtship.

"It is 'plane' that I love you," he began.

"Is that on the 'level?'" she asked.

"Haven't I always been on the 'square' with you?"

"But you have many 'vises,'" she remonstrated.

"Not a 'bit' of it," he asserted.

"What made you 'brace' up?" she queried coquettishly.

"The fact that I 'saw' you," he replied, with a bow.

"I ought to 'hammer' you for that," she answered saucily.

"Come and sit by me on the 'bench,'" he urged.

"Suppose the other should 'file' in?" she murmured. "You shouldn't let your arms 'compass' me."

"I know a preacher who is a good 'joiner,'" he suggested. And they rushed off for the license.—Building Age.

Moral "Risks."

It is pointed out by a modern thinker that there is no such thing as a moral risk, for when we talk about a "risk" we mean that there is a possibility, but not a certainty, that harm will result. A boy takes a physical risk when he goes skating on that part of the river where the ice is thin. He may fall through and injure his health or lose his life. But when we venture on thin ice in our moral life there is no risk in the matter at all. There is assured catastrophe from the moment we start in that direction. No one can do anything which he knows involves possible moral danger without thereby definitely passing beyond the line of mere danger into positive injury to his character.

Three Classes.

Henry Thomas Buckle's thoughts and conversation were always on a high level. Once he remarked:

"Men and women range themselves into three classes or orders of intelligence. You can tell the lowest class by their habit of always talking about persons, the next by the fact that their habit is always to converse about things, the highest by their preference for the discussion of ideas."

Almost Sensational.

"I have a ripping idea for a moving picture film."

"Let's have it. Ripping ideas are scarce."

"Show a young woman doing the housework while her mother is sitting on the porch manicuring her nails."—New York American.

The Welsh Language.

Welsh is taught in the public schools of Wales, is universally spoken there and is extensively spoken in this country. The language is not closely related to the Irish and highland Gaelic, but is of the same branch as the ancient Cornish and Breton languages.

Gold in the Bible.

The earliest book which mentions gold is the Bible. In the second chapter of Genesis, eleventh verse, occur the words, "the whole land of Havilah, where there is gold."

A Dilemma.

Doctor (who is not feeling well, to himself)—What shall I do? I haven't any confidence in any of those other doctors, and, as for myself, my charges are too high.

The Double Standard.

Knicker—How big is your boy? Bocker—He takes a four-year-old street car seat and a ten-year-old suit.—New York Sun.

The noblest part of our existence is based upon sentiment.

Notice for Bids for Roadwork

Office of the Clerk of the Board of Supervisors of Santa Clara County.
San Jose, July 31, 1916.

Sealed bids will be received by the Clerk of the Board of Supervisors of Santa Clara County, at his office until 11 o'clock a. m., August 21, 1916, for the improvement of Campbell avenue in Supervisor District, No. 4, in said County.

Specifications for this work on file in the office of the said Board, to which bidders are hereby referred.

HENRY A. PFISTER,
Clerk of the Board of Supervisors of the County of Santa Clara.
By EUGENE M. DON
Deputy Clerk.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
